Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Action Summary

Acknowledgement is made of applicant's petition for extension of time and request for reconsideration, filed December 13, 2002.

Claims 1-14 and 16-21 are active in this Action.

Response to Arguments

Applicant's arguments filed December 13, 2002, have been fully considered but they are not persuasive. Applicant argues throughout the submitted response that the claimed invention is distinguishable over the cited prior art reference of DeMichele because the claimed invention is directed to raising the amounts of stearidonic acid in relationship to the other fatty acids, like gamma-linolenic acid and eicosapentataenoic acid within the composition of the present invention. Examiner finds this argument unpersuasive. How is applicant's invention different from the disclosure of the cited prior art? What is the unexpected result derived from the claimed invention over the cited prior art? It is suggested that applicant submit some kind of comparative data demonstrating the outcomes achieved by utilizing the composition of the cited prior to the unexpected outcomes achieved by utilizing the composition of the present

claims. As expressed in the previous office action, differences in concentration will not support the patentability of subject matter encompassed by the prior art unless there is evidence indicating such concentration is critical. Applicants can rebut a prima facie case of obviousness based on overlapping ranges by showing the criticality of the claimed ranges. "The law is replete with cases in which the difference between the claimed invention and the prior art is some range or other variable within the claims....In such a situation, the applicant must show that the particular range is critical, generally by showing that the claimed range achieves unexpected results relative to the prior art range." *In re Woodruff*, 919 F.2d 1575, 16 USPQ2d 1934 (Fed. Cir. 1990). To establish unexpected results over a claimed range, applicants should compare a sufficient number of tests both inside and outside the claimed range to show the criticality of the claimed range. *In re Hill*, 284 F.2d 955, 128 USPQ 197 (CCPA 1960).

This rejection is maintained.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
